CodeRED Emergency Alerts

The Ada County Sheriff's Office, in partnership with other local response agencies, have an emergency notification system available to alert the public. The only action required of you to receive instant and timely alerts is to register your cell phone number in the CodeRED database.

CodeRED sends out messages based on geographic locations of residents. If you currently have a land line phone in your home, that phone number is already in the CodeRED database. Cell phones are not. Because so few people have land lines in their homes, it is important to register your cell phone for the system to have the greatest reach. Registering your cell phone ensures that you receive CodeRED alerts

that impact you directly at your home or business.

You can choose the type of message you want to receive which includes phone calls, text messages, emails, and social media. CodeRED is used to keep you informed of incidents and events that can immediately impact your safety. A few examples of why CodeRED would be used to notify you are criminal activity, evacuation notices, wildfires, floods, and missing person cases.
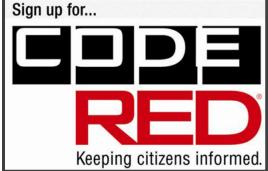

CodeRED also includes a call back feature that allows you to call the number back and hear the message in case you miss the call. To register, visit https://public.coderedweb.com/cne/en-US/BF01DC4DD213

Download The CodeRED Mobile App

The CodeRED Mobile Alert app delivers the same emergency information you get from a phone call, text message, or email. App users are allowed to choose what types of warnings they want to receive. The app works off GPS location so you will be able to get notifications while traveling

through other regions of the country that use the CodeRED system. The app also enables you to see all active alerts across the U.S.

The app provides a display of the area being notified as well as an audio clip of the message. You can also set your notification radius up to

25 miles away from your location.

The app is available for Apple and Android devices. To download the app, visit https://ecnetwork.com/codered-mobile-alert-app/
